Poker21 Enhancement

General Overview

POKER21™ is an exciting game of strategy that combines two popular card games, Poker and 21. Players go for the best possible poker combination without exceeding the total value of 21 (where face cards are revalued so the Jacks are valued as 2, Queens are valued as 3, Kings are valued as 4, and Aces are 1 or 11. The Joker is wild for Poker and has no value for 21.

In POKER21™, player does not play against the dealer. Player plays against the pay-table.

1. To play - make a Poker bet. You may also make a \$1 Bonus bet in the marked area, which wins if your final hand is a pair of Aces or better.
2. Each player is dealt two cards face up. If a player's cards happen to be a pair, they win automatically. Next, they have a choice to improve their hand.
 - e.g: If a player receives 2 Jacks followed by 3 fives, then the player's hand is Full House with a total value of 19 (remember a Jack is counted as 2). The player will receive 11 to 1 on their poker bet and \$30 on the Bonus. A Joker may be used as a wild card for any combination of poker hand.

Amendment I

Players could increase their bet after viewing the first two cards and get paid the same odds as the original bet on the raised bet. Players cannot increase their bet on a natural. Natural is being any first two cards that is a pair or has a joker.

This is a great chance for the players to add excitement to their play and win extra money once they see an opportunity.

Amendment II

Total value of 21 pays 3 to 1 on the bonus.
